MAKING A DIFFERENCE

- Since 2002 -

5th ANNUAL OTTAVIO BELVEDERE CHARITY DINNER

In April 2006, Ottavio Belvedere was diagnosed with a rare cancer called mesothelioma, caused by asbestos. Though 3,000 people are diagnosed with mesothelioma each year, treatment options remain limited due to under-funded research.

In memory of Ottavio Belvedere, the Belvedere family cordially invites you to join them for the **Fifth and Final Annual Ottavio Belvedere Charity Dinner** in support of mesothelioma research. Once again, the event will take place at their family-owned, authentic Italian restaurant, Ottavio's, in Camarillo on **Monday, November 7th, 2011**. The family looks forward to sharing treasured memories with friends while celebrating and honoring Ottavio's life. We currently have raised \$76,000! So, for our final charity dinner we would like to reach our goal of \$100,000! Proceeds generously benefit the Pacific Heart, Lung & Blood Institute, a non-profit medical research organization dedicated to developing new and more effective strategies for treating and preventing malignant pleural mesothelioma. Please come out to enjoy a wonderful meal and support a powerful cause.

For more details, please visit www.phlbi.org. If you are unable to attend on November 7th, but would like to make a donation to PHLBI, please do so at www.phlbi.org or contact them at 310-478-4678.
